

# Adult Diaper Companies Panic as New Bladder Pill Slashes Pad Use

*In just weeks, study participants were amazed to report a jaw dropping decrease in diaper use. Pharmacies may now consider carrying it in lieu of adult diapers.*

By Dr. Stephen Klayman, DC

**US** – As researchers, when running new clinical trials, we never know what to expect.

Most of the time they are complete failures, forcing us back to the drawing board. But in very rare cases, results far exceed our expectations and these product work better than we could have ever imagined.

This is the case with the most recent breakthrough in Urology called *Urivarx*, a new bladder control pill which has performed extraordinary in every test.

From dramatic reductions in urgency and frequency... dribbling and leaking... nighttime bathroom trips... and even diaper use...the improvements men and women are seeing with this nonprescription pill have been phenomenal.

**So phenomenal, in fact, it's been rumored that the new capsule may soon replace diapers in pharmacies across the country.**

Why so effective? We asked its developers that same question.

## **STRENGTHENS THE BLADDER MUSCLES & PREVENTS THEM FROM RELEASING**

Until now, many within the medical community – including myself – believed it was impossible to strengthen the muscles that control the bladder without drugs, surgery, or exercises.

Remarkably, it has now been proven this can be achieved with a tiny a pill. Albeit, a natural one.

*The secret?* A revolutionary discovery that helps the bladder create a tighter seal... while also preventing your bladder from releasing involuntarily.

Research shows that as we age, the muscles surrounding the bladder can deteriorate. This is triggered by hormonal changes in the body which results in *muscle atrophy*, the medical term for muscle shrinking.

When these muscles get too small and weak, they cannot seal the bladder shut. That's why you may leak, dribble, and experience uncontrollable accidents.

Worse, because the bladder fails to empty completely, you feel like you need to go all the time! And as old urine just sits there, it can seep into your blood stream, causing painful infections which need multiple rounds of antibiotics to get rid of.

## **"URIVARX TARGETS A FAILING BLADDER IN A WHOLE NEW WAY"**

In its most recent clinical trial, scientists discovered a trio of science based compounds that actually strengthen the tiny muscles surrounding the bladder. So effectively that they were shown to decrease adult diaper use by a staggering 400%.

Even more surprising, these three compounds also had a rejuvenating effect on the bladder, allowing it to work like it was years younger.

*The result?* All the worries you have about your overactive bladder can finally be put to rest! And you can enjoy a new level of comfort of confidence that you once had before. And it starts happening in minutes.

**Could a Pill Really Replace Adult Diapers? Researchers Seem to Think So. A recent study found that the new pill, Urivarx, led to a significant decrease in diaper and pad use.**

## **IMPRESSIVE CLINICAL RESULTS**

The exciting clinical results published on the government clinical website [clinicaltrials.gov](http://clinicaltrials.gov) show that *UriVarx*™ can strengthen your bladder fast, significantly reducing the urine urgency and leaks.

In a new double-blind, placebo-controlled clinical study, 142 men and women with bladder control issues were separated into two groups. The first group was given a placebo while the other received *UriVarx*™.

**The results were incredible.**

The participants who received *UriVarx*™ saw major improvements in leaking, pressure, and the urgency to go – all without the usual side effects seen in prescription drugs! They also reported fewer trips to the bathroom both day and night.

Overall, the *UriVarx*™ group experienced:

- 56% Reduction in Urge Incontinence
- 66% Reduction in Stress Incontinence
- 61% Reduction in Urgency
- 33% Reduction in Frequency
- 46% Reduction in Nighttime Bathroom Trips

Additionally, at the end of clinical trial and after seeing the results, 84% of the participants taking *UriVarx*™ said it significantly improved their quality of life.

"The clinical findings are incredible, but people still wonder if it will really work" explains lead developer for *Urivarx*. "It's normal to be skeptical, but we've seen thousands of *UriVarx*™ users get results exactly like the participants in the study. It's an amazing product."

## **EXCITING RESULTS FROM URIVARX USERS**

Many *UriVarx*™ users say their bladders have never been stronger. For the first time in years, they are confident and in complete control. Adult pads and diapers are no longer a big worry.

"It's exciting to hear all of the positive feedback" explains a spokesperson for the company.

"Its also helps to gain perspective. These people will share how embarrassed they've become over the situation. How uncomfortable it makes social outings and

the interruptions it causes in daily life.

They can't believe the change *Urivarx* has made. The fear is gone. They are back to feeling in control"

## **HOW IT WORKS**

*UriVarx*™ is a pill that's taken just once daily. It does not require a prescription.

The active ingredients are patented natural extracts.

Research shows that as we get older, the muscles which surround the bladder weaken. This is caused by hormonal changes in the body that causes the muscles to atrophy and weaken.

When they become too small and weak, they cannot seal your bladder shut, which causes leaking, accidents, among other incontinence symptoms.

It also prevents your bladder from fully emptying, which can result in persistent bacterial infections and UTIs.

*UriVarx*'s™ active ingredient targets the muscles around the bladder, making them stronger. Supporting ingredients in *UriVarx*™ support kidney function and overall urinary health.

## **BLADDER PROBLEMS GONE**

With daily use, *UriVarx*™ can restore strong bladder control and help users overcome leakage without the negative side effects or interactions associated with drugs.

Leakage sufferers can now put an end to the uncontrollable urges, the embarrassing accidents, and enjoy an entirely new level of comfort and confidence.

## **HOW TO GET URIVARX IN MONTANA**

This is the official release of *UriVarx*™ in Montana. As such, the company is offering a special discounted supply to anyone suffering from bladder issues who calls within the next 48 hours.

A special hotline number and discounted pricing has been created for all Montana residents. Discounts will be available starting today at 6:00AM and will automatically be applied to all callers.

Your Toll-Free Hotline number is 1-800-954-0188 and will only be open for the next 48 hours. Only a limited discounted supply of *UriVarx*™ is currently available in your region.
