**MYKONOS:** According to the **National Institute on Deafness**, a staggering 89% of Americans will eventually have to deal with hearing loss. But now, a well-respected Greek inventor claims he's perfected an eardrop that helps you hear better — without needing a hearing aid.

The eardrop is getting a lot of attention. After all, if a low-cost eardrop could reboot hearing, some predict the billion-dollar hearing aid industry could be out of business by 2023.

### Hear What You've Been Missing

It's reported that the drops are powerful. Some say they can now hear things they couldn't hear before. Others tell us they no longer struggle to hear the T.V. or ask people to repeat themselves anymore.

### Untreated Hearing Loss Often Leads to Depression

Researchers at the University of British Columbia report every 10-decibel drop in hearing sensitivity, the odds of social isolation increase by 52%. Left untreated, the loss of hearing results in feelings of depression and diminished quality of life.

We tracked the inventor of the drops down to a small island just off the coast of Mykonos. He was very protective about his privacy. But the man, (who only goes by the name J.D.) was very excited to openly talk about his eardrop formula.

J.D. cleverly calls his drops **Audiolo-G**. Most users agree it really is remarkable.

"The drops let you hear sounds you may not have heard in a while, like the purring of a cat or the quiet hum of a small fan. But the biggest news is, **Audiolo-G** works after the very first dose... no matter how bad your hearing is."

But the inventor won't reveal how it works. According to J.D., "Everybody is trying to get their hands on my formula. It wasn't easy to come by and I definitely won't let Big Pharma steal it from me. That's for sure."

### The Earthquake That Clobbered His Hearing

For J.D., it all started in 1978 when his hearing was devastated by a massive earthquake. The collapse of a building wreaked havoc with his ears. From then on, he dealt with the same embarrassment and isolation of anyone who suffers with their cloudy hearing.

### Frustrated Friends & Family

Ordinary conversation was impossible. "I'd make my friends

Could this inventor's "Miracle Eardrops" be the end of the multi-billion-dollar hearing aid industry? Reported to work no matter how bad your hearing is.

repeat every other word. It got so bad, some avoided me altogether. They would joke. "We can tell J.D. anything. He won't say anything. He can't hear a word you say."

### From Desperation to Discovery

J.D. tried every supplement and hearing device he could find. Nothing worked. "Most of the time, my hearing was cloudy. But sometimes I had no idea what was going on." So the inventor began to experiment in his kitchen "science lab."

### Old Family Remedy to The Rescue

J.D.'s great-grandmother proudly talked about the secret "miracle drops" too. After all, they were handed down for generations. She was delighted about all the people it helped over the years.

Through many conversations, J.D. learned about the ingredients used in the special ear drops. He discovered which herbs to use and not to use. How they were picked at distinct times of the year... and grown only in special soil.

### "It Worked. It Really Worked."

And then one day, "I finally discovered just the right combination." J.D. became his own guinea pig.

He put the drop in his left ear and felt a pleasant WHOOSH. It felt great. Like a great blockage was removed. "I cried tears of joy. I got my clear hearing back!"

**Now I Watch TV Without Subtitles**

"I was totally Depressed. I could only watch TV with the subtitles on. Now it's not a problem," says Sofia K. age 71.

**Everybody Stopped Yelling**

"I used to think people were speaking low, until I realized I had a problem. But now people don't have to yell for me to hear them and it only took a few drops." Darius K. age 53.

In fact, J.D. claims to have restored almost all the elders in his village of weak hearing. And now, he wants to share his joy with everyone. That's why you're reading this article right

### Clinical-Strength Dose

These clinical-strength eardrops can be used safely by anyone with muted or stuffy hearing. You won't need to struggle with insurance companies to try it. And best of all, you won't be embarrassed by an ugly tube hanging out of your ear canal.

### The Great Big Hearing Aid Rip-Off

The dirty little secret about hearing aids is no matter how small they are, they still feel like an ant crawling in your ear. And contrary to the sales pitch... they're embarrassing, because with those wires sticking out of your ears, everybody knows you're hard of hearing.

Plus, they're expensive... average cost is around \$5,000 or more. And the cheaper models just give you an earful of buzzing and whistling noises.

### Never Sold in Stores

It's not easy but J.D. purposely keeps his secret recipe from Big Pharma. "They'd like nothing more than to see me go away." So to keep his formula secret, J.D. made arrangements with a small company that agrees to keep the formula secret and the price low. **Audiolo-G** is never sold in retail stores that rely on middlemen to jack up the price.
