# New Pill Strengthens The Bladder Muscles, Reducing Accidents and Bed Wetting

## A pill recently approved by Health Canada to improve urinary incontinence.

By Dr. Stephen Klayman, DC.

**TORONTO** - Adult diaper sales are expected to plummet following results from a clinical trial on a new, patented bladder control pill.

Sold under the brand name *UriVarx*<sup>®</sup>, the new pill contains an ingredient that keeps the bladder from releasing voluntarily, which reduces accidents and frequent bathroom trips.

Perhaps more impressive, it also targets the tiny muscles around the bladder, which helps the bladder to create a tighter seal.

This would explain why the average *UriVarx*<sup>®</sup> user in clinical trials experienced a 66% reduction in urinary incontinence symptoms, such as day and night leaking and sudden urges to urinate.

### NEW DISCOVERY IN BLADDER CONTROL

Until now, doctors believed it was impossible to strengthen the muscles that control the bladder. They are amazed to see that it can now be done with a pill.

"As you get older, and the involuntary muscles around your bladder weaken, you lose urinary control. With your bladder wall unable to properly seal, you constantly leak and feel pressure to urinate" explains Dr. Stephen Klayman.

"*UriVarx*<sup>®</sup> targets the bladder muscles and help restores vital kidney health, reducing urgency and frequency. In the case you really have to "go" it helps keep the bladder sealed tighter until you find a bathroom.

### FREEDOM FROM SUDDEN URGES AND LEAKS

Since hitting the North American market, sales for the patented *UriVarx*<sup>®</sup> pill have soared and there are some very good reasons why.

To begin with, the results from its recent double blind clinical trial were truly remarkable. Out of the 150 test subjects, participants taking *UriVarx*<sup>®</sup> saw a stunning reduction in urinary frequency, which resulted in fewer bathroom trips both day and night.

They also experienced a dramatic decrease in incontinence episodes, such as leaking and bed wetting.

Although these results almost unbelievable, Klayman is not surprised.

The patented-ingredient blend in *UriVarx*<sup>®</sup> targets the bladder muscles which are absolutely vital for regaining control.

Research has shown that as you get older, certain hormonal changes in the body cause these muscles to shrink and become loose. This is what causes the bladder to be over active and the resulting urine accidents.

### EXCITING RESULTS FROM URIVARX<sup>®</sup> USERS

Many *UriVarx*<sup>®</sup> users say their bladders have never been stronger. For the first time in years, they are confident and in complete control. Adult pads and diapers are no longer a big worry.

"After my third child, I couldn't control my bladder. I was running to the bathroom all the time! And once I hit my 60s it became so unpredictable I needed to wear adult pads every day" explained one user.

"I was embarrassed so before going to my doctor I decided to try *UriVarx*<sup>®</sup> and I'm so glad I did! The urgency is gone and I no longer feel like my bladder is about to explode. I can also "hold it" when I need to so I'm no longer living in constant fear of finding a bathroom."

### NOW APPROVED FOR OVERACTIVE BLADDER & INCONTINENCE

During the clinical trial of *UriVarx*<sup>®</sup>, researchers found that one pill daily can strengthen your bladder fast, significantly reducing the urinary urgency and leaks.

The double blind, placebo control study took place in two primary care centers where 150 male and female participants with bladder control issues were separated into two groups. The first group was given a placebo while the other received *UriVarx*<sup>®</sup>.

Remarkably, participants who received *UriVarx*<sup>®</sup> saw major improvements in leaking, pressure, and the urgency to go – all without the usual side effects seen in prescription drugs! They also reported fewer trips to the bathroom both day and night.

### Overall, the *UriVarx*<sup>®</sup> group experienced:

- 56% Reduction in Urge Incontinence
- 66% Reduction in Stress Incontinence
- 61% Reduction in Urgency
- 33% Reduction in Frequency
- 46% Reduction in Nighttime Bathroom Trips
- 475% Decrease in Diaper/Pad Use

### Experts Predict a Pill Will Replace Adult Diapers:

The pill, called *UriVarx*, has been shown to reduce urinary incontinence symptoms by 66%. Risk Free Supplies being offered to Readers who qualify.

Additionally, at the end of clinical trial and after seeing the results, 84% of the participants taking *UriVarx*<sup>®</sup> said it significantly improved their quality of life. All together, the study earned *UriVarx*<sup>®</sup> the Health Canada approval for overactive bladder and incontinence.

"The clinical findings are incredible, but people still wonder if it will really work" explains Dr. Klayman. "It's normal to be skeptical, but we've seen thousands of *UriVarx*<sup>®</sup> users get results exactly like the participants in the study. It's an amazing product."

### HOW IT WORKS

*UriVarx*<sup>®</sup> is a pill that's taken just once daily. It does not require a prescription. However, is approved by Health Canada.

The active ingredients are patented natural extracts.

Research shows that as we get older, the muscles which surround the bladder weaken. This is caused by hormonal changes in the body that causes the muscles to atrophy and weaken.

When they become too small and weak, they cannot seal your bladder shut, which causes leaking, accidents, among other incontinence symptoms.

It also prevents your bladder from fully emptying, which can result in persistent bacterial infections and UTIs.

*UriVarx*<sup>®</sup> active ingredient targets the muscles around the bladder, making them stronger. Supporting ingredients in *UriVarx*<sup>®</sup> support kidney function and overall urinary health.

### BLADDER PROBLEMS GONE

With daily use, *UriVarx*<sup>®</sup> can restore strong bladder control and help users overcome leakage without the negative side effects or interactions associated with drugs.

Leakage sufferers can now put an end to the uncontrollable urges, the embarrassing accidents, and enjoy an entirely new level of comfort and confidence.

### HOW TO GET URIVARX<sup>®</sup> IN CANADA

This is the official release of *UriVarx*<sup>®</sup> in Canada. As such, the company is offering a special discounted supply to anyone suffering from bladder issues who calls within the next 48 hours.
