

This New Bladder Control Pill May Replace Adult Diapers

Clinical studies show new pill may be effective enough to replace adult diapers for bladder control; initial users show dramatic reduction in trips to the bathroom, embarrassing leaking, and nighttime urgency.

Robert Ward,
Associated Health Press

AHP – Adult diaper sales are expected to plummet as results from a clinical trial on a new, patented bladder control pill have finally been released.

Sold under the brand name *UriVarx™*, the new pill contains key ingredients that keeps the bladder from releasing voluntarily, which reduces accidents and frequent bathroom trips.

Perhaps more impressive, it also targets the tiny muscles around the bladder, which helps the bladder to create a tighter seal.

This would explain why the average *UriVarx™* user in clinical trials experiences a 66% reduction in urinary incontinence symptoms, such as day and night leaking and sudden urges to urinate.

NEW DISCOVERY IN BLADDER CONTROL

Until now, doctors believed it was impossible to strengthen the muscles that control the bladder. They are amazed to see that it can now be done with the non-prescription *UriVarx™* pill.

“As you get older, and the involuntary muscles around your bladder weaken, you lose urinary control. With your bladder wall unable to properly seal, you constantly leak and feel pressure to urinate” explains Dr. Bassam Damaj of Innovus Pharmaceuticals.

“*UriVarx™* targets the bladder muscles and help restores vital kidney health, reducing urgency and frequency. It also helps you “hold it” for hours so you never have to worry about embarrassing accidents ever again!”

FREEDOM FROM SUDDEN URGES AND LEAKS

Since hitting the market, sales for the patented *UriVarx™* pill have soared and there are some very good reasons why.

To begin with, the double blind large clinical studies published in the clinicaltrials.gov have been impressive. Participants taking *UriVarx™* saw a **stunning reduction** in urinary frequency, which resulted in fewer bathroom trips both day and night.

They also experienced a **dramatic decrease** in incontinence episodes, such as leaking and bed wetting.

The active ingredients in *UriVarx™* comes from a patented formula. It is both safe and healthy. There are also no known serious side effects in its history of use.

Scientists believe that the ingredients target the muscles of the bladder to grow stronger. These muscles are responsible for keeping the bladder tightly sealed. They also help the bladder to completely empty, allowing bacteria to be flushed from the urinary tract.

Research has shown that as you get older, certain hormonal changes in the body cause these muscles to shrink and become lose. This is what causes the bladder to be over active and the resulting urine accidents and why

NEW PILL MAY REPLACE DIAPERS FOR BLADDER CONTROL: This new patented clinically proven pill solution is now available nationwide

UriVarx™ seems to be so effective in the published clinical trials.

EXCITING RESULTS FROM URIVARX USERS

Many *UriVarx™* users say their bladders have never been stronger. For the first time in years, they are confident and in complete control. Adult pads and diapers are no longer a big worry.

“After my third child, I couldn’t control my bladder. I was running to the bathroom all the time! And once I hit my 60s it became so unpredictable I needed to wear adult pads every day” explained Marie L. of Danbury, CT.

“I was embarrassed so before going to my doctor I decided to try *UriVarx* and I’m so glad I did! The urgency is gone and I no longer feel like my bladder is about to explode. I can also “hold it” when I need to so I’m no longer living in constant fear of finding a bathroom.”

IMPRESSIVE CLINICAL RESULTS

The exciting clinical results published on the government clinical website clinicaltrials.gov show that *UriVarx™* can strengthen your bladder fast, significantly reducing the urine urgency and leaks.

In a new double-blind, placebo-controlled clinical study, 142 men and women with bladder control issues were separated into two groups. The first group was given a placebo while the other received *UriVarx™*.

The results were incredible. The participants who received *UriVarx™* saw major improvements in leaking, pressure, and the urgency to go – all without the usual side effects seen in prescription drugs! They also reported fewer trips to the bathroom both day and night.

Overall, the *UriVarx™* group experienced:

- 56% Reduction in Urge Incontinence
- 66% Reduction in Stress Incontinence
- 61% Reduction in Urgency
- 33% Reduction in Frequency
- 46% Reduction in Nighttime Bathroom Trips

Additionally, at the end of clinical trial and after seeing the results, **84% of the participants taking *UriVarx™* said it significantly improved their quality of life.**

“The clinical findings

are incredible, but people still wonder if it will really work” explains Dr. Bassam Damaj. “It’s normal to be skeptical, but we’ve seen thousands of *UriVarx™* users get results exactly like the participants in the study. It’s an amazing product.”

HOW IT WORKS

UriVarx™ is a pill that’s taken just once daily. It does not require a prescription.

The active ingredients are patented natural extracts.

Research shows that as we get older, the muscles which surround the bladder weaken. This is caused by hormonal changes in the body that causes the muscles to atrophy and weaken.

When they become too small and weak, they cannot seal your bladder shut, which causes leaking, accidents, among other incontinence symptoms.

It also prevents your bladder from fully emptying, which can result in persistent bacterial infections and UTIs.

UriVarx’s™ active ingredient targets the muscles around the bladder, making them stronger. Supporting ingredients in *UriVarx™* support kidney function and overall urinary health.

BLADDER PROBLEMS GONE

With daily use, *UriVarx™* can restore strong bladder control and help users overcome leakage without the negative side effects or interactions associated with drugs.

Leakage sufferers can now put an end to the uncontrollable urges, the embarrassing accidents, and enjoy an entirely new level of comfort and confidence.

HOW TO GET URIVARX IN INDIANA

This is the official release of *UriVarx™* in Indiana. As such, the company is offering a special discounted supply to anyone suffering from bladder issues who calls within the next 48 hours.

A special hotline number and discounted pricing has been created for all Indiana residents. Discounts will be available starting today at 6:00AM and will automatically be applied to all callers.

Your Toll-Free Hotline number is 1-800-607-8837 and will only be open for the next 48 hours. Only a limited discounted supply of *UriVarx™* is currently available in your region.
